🪪 Profile

I am a full-stack developer with over **6 years** of experience, capable of delivering products from wireframe and possessing excellent knowledge about the SDLC. I am available in both European and North American time zones and am willing to work independently or in a team. My expertise lies in back-end development, but I also have versatile knowledge of front-end technologies. I am well-versed in modern web technologies and am always eager to learn new ones when required.

💼 Professional Experience

HappyMonster, formerly ThemeBucket ⬈   Jan 2021 – present | Dhaka, Bangladesh
Sr. Software Engineer
- Led full development cycle to build a SaaS platform using Laravel and Vue.js to manage WordPress sites remotely. Developed a custom WordPress plugin called Eazy Plugin Manager to connect it with SaaS.
- Developed and enhanced features for HappyAddons, an Elementor add-on with 300K+ active users. Improved the add-on's speed and performance.
- Managed various teams of 5-10 members responsible for developing, designing UI, testing functionality, and documenting the project.

PaymentCloud ⬈   CA, USA
WordPress Developer (Remote Freelance)
- Developed new features and enhancements for the company's blog site using WordPress and PHP
- Improved the blog site's SEO and lead generation by creating custom forms and Gutenberg blocks
- Used Laravel as a middleware to integrate the blog site with Zoho CRM and store and manage leads from the blog

Code Climate ⬈   NY, USA
Frontend Developer (Remote Freelance)
- Developed user-friendly and responsive front-end features using Vue.js, HTML, and (S)CSS
- Integrated headless WordPress as a back-end solution and fetched data using WP GraphQL
- Designed web pages following the company's branding and style guidelines

VoidCoders ⬈   May 2020 – Dec 2020 | Dhaka, Bangladesh
Software Engineer

Xpeedstudio ⬈   Jul 2019 – Apr 2020 | Dhaka, Bangladesh
*Software Engineer*
